

Introduction to SDGs and assessing the progress on SDG implementation

Sami Pirkkala

Prime Minister's Office

11 October 2018

Development is on a sustainable basis when we take care of both ecological ceiling and social foundation

Three levels of follow-up and review

Global

Regional

National

Follow-up and review of the 2030 Agenda implementation in Finland

National sustainable development indicators will be updated [...]

[...] system that permits the multi-voiced interpretation of indicator data will be made in connection with the update.

A comprehensive and independent assessment of Finland's sustainable development policy and the national implementation of the 2030 Agenda will be conducted every four years, starting in 2019.

The implementation plan will be updated to ensure consistency with the recommendations made.

Information on monitoring

State of nature and the environment

Housing and communities

Social inequality

Resource-wise economy and carbon neutral society

Public procurements and consumption

Social exclusion and inclusivity

Working life, quality and change

Global responsibility and policy coherence

Education and development of competence

STATE OF SUSTAINABLE DEVELOPMENT

what do the facts tell?

Read about the monitoring and indicators for sustainable development, comment on them and tell us what you think! You may also present other indicators or recent studies that supplement or challenge the state as we see it.

The Prime Minister's Office and the Finnish National Commission on Sustainable Development will read the discussions and pick out topics to be promoted in various ways. The key messages are compiled and presented at the annual event on the state and future of sustainable development each May.

The monitoring is being developed further and the service content will be supplemented in spring 2018. You are welcome to send any feedback and development proposals to Sami Pirkkala (firstname.lastname@vnk.fi)..
