

Curriculum for the academic year 2025-2026

The curriculum comprises a confirmed overall description of the learning objectives (learning outcomes) of a degree program, the goals and contents of study modules, the offering of courses and the organisation of teaching within a given period of time. (Aalto University General Regulations on Teaching and Studying, Section 2). The curriculum design shall follow the Aalto University strategy, the strategic action plans of the Aalto schools and the university's curriculum policies. Curriculum design is based on the feedback received on courses and programs (course feedback, feedback from graduating students, the report on the student well-being survey, and the program director's report).

Study methods, assessment criteria and study material for each course will be listed in each course syllabus.

1. Goals and learning objectives for the Bachelor's Program in International Business (page 2)
2. The structure of the Bachelor's Program in International Business, Mikkeli Campus (page 3)
3. BScBA Curriculum 2025-2026 on one page (page 4)
4. Course descriptions and learning outcomes (pages 7-93)

BACHELOR'S PROGRAMME IN INTERNATIONAL BUSINESS

Goals and objectives

The purpose of the Bachelor of Science degree in Economics and Business Administration at the Aalto University School of Business is to give students a broad background in business and economics as well as the opportunity to specialize in a particular area of expertise. The studies are designed to develop both academic as well as working life competences and introduce multidisciplinary perspectives. In the Bachelor's Programme in International Business at the Mikkeli Campus, students belong to a tight-knit, multicultural learning community, working alongside faculty and students from around the world. The fast-paced curriculum prepares students to meet grand challenges in the global business environment, such as sustainability; engage in ethical decision-making, and begin a journey of life-wide learning.

The specific goals and objectives of the Bachelor's Programme in International Business are listed below.

1. Business knowledge

Good knowledge of the basics in business and economics, very good knowledge of the field of international business, and good knowledge of subjects taken in minor studies.

Programme Learning Objectives

By graduation our students will demonstrate the ability to:

- understand the core subjects comprising business and economics;
- apply key theories, concepts and frameworks to international business;
- analyse grand challenges in the global business environment; and
- formulate and critically develop international business strategies and business models.

2. Management competences

Good abilities to analyse and develop the operations of companies and other organizations, considering ethical, economic, societal and global sustainability aspects. Very good abilities to navigate various international business contexts.

Programme Learning Objectives

By graduation our students will demonstrate the ability to:

- develop cultural competences;
- compile, analyse and visualise data for effective decision-making;
- cultivate an entrepreneurial mindset; and
- address global sustainability challenges and develop creative responses to them.

3. Communication and teamwork competences

Good competences in these areas: communication and interaction; project management; self-management. Very good competences in multicultural teamwork.

Programme Learning Objectives

By graduation our students will be able to:

- engage in clear and analytic oral and written communication;
- demonstrate good communication skills in English and other languages; and
- foster inclusion and work collaboratively in multicultural teams.

4. Scientific thinking

Good competences in scientific thinking and working methods.

Programme Learning Objectives

By graduation our students will be able to:

- understand and use key research methods in the field of international business;
- analyse qualitative and quantitative data for research purposes; and
- strengthen the skills needed for further studies and life-wide learning.

The structure of the Bachelor's Program in International Business, Mikkeli Campus

Courses	Number of credits
Fundamentals of Business Knowledge

Data Visualization and Storytelling for Business	4
Sustainability in Business	6
Business Mathematics with Excel Applications	6
Academic Writing	6
Introduction to Management	6
Principles of Economics	6
Principles of Accounting	6
Operations Management	6
Introduction to Marketing	6
Principles of Finance	6
Introduction to Statistics	6
Introduction to Business Law	6
	71
Language and Communication Courses	
English	
Business Communication	3
Other Foreign Language Courses	
Spanish, French, German or Finnish for Foreigners 2-4	6
Finnish Business Communication or Finnish for Foreigners 1***	3
Swedish Business Communication****	3
	15
Courses in Major	
Global Business Environment	6
Intercultural Management	6
Research Methods in International Business	6
Multidisciplinary Aalto studies (several possible electives offered by BScBA)	6
Elective Courses in International Business*	12
Capstone Course	6
Bachelor's Thesis and Seminar	10
Maturity Test	0
	52
Minor Subject Studies	
Study abroad period**	30
Elective Studies	
different options*****	12
Total Credits	180

* The student must complete 12 cr of electives in International Business offered in the BScBA Program.

** Students must complete 30 credits (ECTS) during the study abroad period. A minimum of 24 of the study abroad credits must be in the field of business. Six (6) of the study abroad credits may be in humanities, social sciences or related areas that focus on historical, cultural, political or sociological studies. It is also acceptable to do language studies (max 6 credits) as part of the Minor Subject Studies, if you have not studied the same language for the BScBA degree. Those who are exempted from the study abroad requirement have to complete 30 cr in the Mikkeli BScBA Program.

*** Finnish Business Communication is required of those who have had Finnish or Swedish as their language of education in comprehensive (grades 1–9) and/or upper secondary (grades 10–12) school in Finland.

- The other students are required to complete the course Finnish for Foreigners.

**** Swedish Business Communication is required of those who have had Finnish as their language of education in comprehensive (grades 1–9) and upper secondary (grades 10–12) school in Finland.

- Those who have had Swedish as their language of education in comprehensive and upper secondary school in Finland, will complete a special advanced course in Swedish language (please contact the Mikkeli study office for more information).

- For others, the missing 3 cr can be earned by taking other language and communication courses.

***** Examples of options to be considered:

- more language studies offered by the Mikkeli BScBA program

- elective courses offered by the Mikkeli BScBA program -> will be placed under Courses in Major

MODULE	BScBA CURRICULUM 2025-2026 ¹

BIZM.kyps - Maturity Test

Permanent basic information

Name (FI): Kypsyysnäyte

Code: BIZM.kyps

Scope:

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (FI):

Learning outcomes (EN):

Content (FI):

Kandidaatin tutkinnon kypsyysnäyte osoittaa 1) perehtyneisyyttä tutkielman aihepiiriin ja 2) suomen tai ruotsin kielen taitoa. Jos opiskelija on saanut koulusivistyksensä jollakin muulla kuin suomen tai ruotsin kielellä, hän kirjoittaa kypsyysnäytteen englannin kielellä (vaatii virallisen vapautuspäätöksen).

Content (EN):

Bachelor's degree maturity test is intended to demonstrate 1) that the student is familiar with the field in which the Bachelor's thesis is written and 2) the student's proficiency in Finnish or Swedish. If the student has obtained his or her secondary education in any other language than Finnish or Swedish, he or she may write the maturity test in English (exemption needs an official decision).

Registration selection criteria (FI):

Kurssi on suunnattu vain Mikkelin kampuksen opiskelijoille.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

BIZM312.kand - Bachelor's Thesis and Seminar

Permanent basic information

Code: BIZM312.kand

Scope: 10

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

In the Bachelor's thesis process students develop competences in the following areas: 1) Goal setting and research approach: The student identifies a research problem in consultation with their supervisor, and develops a research plan, including appropriate research methods; 2) Command of the topic: The student conducts a comprehensive and critical review of existing literature related to their research question, and, if applicable, collects and analyzes relevant data using appropriate research methods. The student derives meaningful conclusions and discusses their implications; 3) Communication of research findings: The student effectively presents their research findings, both orally and in a written format. In addition, the student clearly conveys the key findings and responds to questions about the work. The thesis is written following academic conventions and standards; and 4) Research process: The student develops a project plan for the thesis and implements it in a timely manner. The student effectively manages their research process, drawing on support from their thesis supervisor. They give and receive constructive feedback to improve their own work and the work of others.

Content (EN):

The Bachelor's thesis and seminar focus on developing the student's skills in conducting academic research in their field, as well as preparing the student for their Master's studies and working life.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-A1201 - Sustainability in Business

Permanent basic information

Code: MLI-A1201

Scope: 6

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand how economic, environmental and social sustainability are an integral, interrelated and complex part of the landscape in which business organizations operate, 2) understand sustainability at three levels: societal, organizational and individual, 3) critically analyze the sustainability performance of an organization on a range of relevant dimensions, 4) reconcile complex ethical dilemmas based in domestic and international organizational contexts, and 5) examine sustainable business practices as a value driver for business and society.

Content (EN):

This course explores the relationship between business and sustainability, which encompasses environmental, economic, and social factors. Students are introduced to the key frameworks, concepts and tools of sustainability in business, including ethics and corporate social responsibility. Particular emphasis is placed on the role of the UN Sustainable Development Goals as well as contemporary best practices, cases and applications. In that context, students are encouraged to think creatively about potential responses by profit-based organizations to global sustainability challenges.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-A7101 - Finnish for Foreigners 1

Permanent basic information

Name (FI): Finnish for Foreigners 1

Code: MLI-A7101

Scope: 3

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (FI):

Kurssin suoritettuaan opiskelija: 1) osaa käyttää lyhyitä yksinkertaisia ilmaisuja (esimerkiksi liittyen itsensä esittelemiseen, kellonaikaan, osto- ja maksutilanteisiin sekä ruokaan ja ruokalistoihin), 2) selviytyy suomen kielellä yleisistä sosiaalisista tilanteista, 3) osaa kirjoittaa lyhyitä viestejä, ja 4) ymmärtää suomalaisen kulttuuriin ja elämäntapoihin liittyviä keskeisiä asioita.

Learning outcomes (EN):

Learning outcomes for this course; upon successful completion, students will demonstrate: 1) use short and simple Finnish expressions in everyday life (for example, introducing oneself, telling the time, buying and paying, food and menus), 2) manage in Finnish in common social situations, 3) write short messages, and 4) understand key aspects of Finnish culture and ways of life.

Content (FI):

Kurssilla esitellään suomen kieltä ja kulttuuria ulkomaalaisille opiskelijoille sekä mahdollistetaan heidän integroitumisensa paremmin suomalaiseen opiskelijaelämään, paikalliseen yhteisöön ja yrityselämään. Kurssilla esitellään arkielämän sanastoa ja kieliopin perusteita (partitiivi, genetiivi, verbien tyypit 1-5, possessiivit). Opiskelijat

harjoittelevat arkipäivään ja sosiaaliseen elämään liittyviä tilanteita (kysyen ja vastaten kysymyksiin).

Content (EN):

This course is designed to introduce Finnish language and culture to foreign students and enable them to better integrate into Finnish student life, the local community, and business life. It introduces basic vocabulary of daily life and the basic grammatical structures of Finnish (partitive and genitive, verb types 1–5, possessives). Students will practice situations related to everyday tasks and social life (asking and answering questions).

Registration selection criteria (FI):

Kurssi on suunnattu vain Mikkelin kampuksen opiskelijoille.

Registration selection criteria (EN):

MLI-A7102 - Finnish for Foreigners 2

Permanent basic information

Name (FI): Finnish for Foreigners 2

Code: MLI-A7102

Scope: 3

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (FI):

Kurssin suoritettuaan opiskelija: 1) osaa puhua keskeisistä arkipäivän asioista, 2) osaa toimia rutiinitilanteissa ja tehdä yleisiä tiedusteluja, 3) ymmärtää ja osaa kirjoittaa lyhyitä töihin tai opiskeluun liittyviä viestejä, 4) löytää tarvittavan keskeisen tiedon kurssin teemoihin liittyvistä lyhyistä teksteistä ja 5) tietää joitakin suomalaisen arkipäivään ja töihin liittyviä keskeisiä asioita.

Learning outcomes (EN):

Learning outcomes for this course; upon successful completion, students will demonstrate an ability to: 1) talk about the main features of their daily life, 2) function in routine situations and make common enquiries, 3) understand and be able to produce short written messages about situations in their day of working or studying, 4) find the main information they need from short texts on course themes, and 5) know some of the main features of Finnish everyday life and work.

Content (FI):

Kurssilla syvennetään ulkomaalaisten opiskelijoiden tietämystä suomen kielestä ja kulttuurista. Opiskelijoiden arkielämään ja töihin (esimerkiksi ruokaan, matkustamiseen ja ajan ilmaisemiseen) liittyvä sanasto kasvaa. Opiskelijat harjoittelevat käytännössä arkipäivään ja sosiaaliseen elämään liittyviä tilanteita (esimerkiksi ostosten teko, terveydenhoitoon liittyvät käynnit).

Content (EN):

This course is designed to deepen foreign students' knowledge of Finnish language and culture. Students will expand their vocabulary related to everyday life and work (e.g. food, travel, expressions of time). They will also deepen their knowledge of the grammatical structures of Finnish. Practice situations related to everyday tasks and social life (e.g. shopping, medical visits) will be arranged.

Registration selection criteria (FI):

Kurssi on suunnattu vain Mikkelin kampuksen opiskelijoille.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-A7103 - Finnish for Foreigners 3

Permanent basic information

Name (FI): Finnish for Foreigners 3

Code: MLI-A7103

Scope: 3

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (FI):

Kurssin suoritettuaan opiskelija: 1) osaa kertoa koulutus- ja työhistoriastaan sekä muista menneistä tapahtumista, 2) osaa sanoa mielipiteensä ja toimia sujuvammin arkipäivän keskusteluissa, 3) löytää keskeisen kurssin aiheisiin liittyvän tiedon, and 4) ymmärtää ja osaa kirjoittaa pitkäkököjä tekstejä.

Learning outcomes (EN):

Learning outcomes for this course; upon successful completion, students will demonstrate an ability to: 1) talk about their education and work history and other past events, 2) give opinions and operate more smoothly in everyday conversations, 3) find the main information they need on course topics, and 4) understand and be able to write somewhat longer texts.

Content (FI):

Kurssilla syvennetään edelleen opiskelijoiden tietämystä suomen kielestä, kulttuurista ja työelämästä. Opiskelijoiden esimerkiksi asumiseen, ulkoiluun, koulunkäyntiin ja työhön liittyvä perustanasto kasvaa ja kieliopin osaaminen laajenee: objektimuoto, menneisyyteen viittaavat muodot. Kurssilla harjoitellaan jokapäiväiseen elämään liittyviä keskustelutilanteita.

KURSSIN CEFR-TAVOITETASO: A1.3

Content (EN):

This course is designed to further deepen students' knowledge of Finnish language, culture and working life. Students will expand their basic vocabulary, e.g. housing, the outdoors, schooling, work; and knowledge of grammar: the object form, forms for referring to the past. The course will provide opportunities for practicing everyday conversational situations.

Target CEFR level: A1.3

Registration selection criteria (FI):

Kurssi on suunnattu vain Mikkelin kampuksen opiskelijoille.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

Teaching Periods: 2024-2025 Module 14 / 2025-2026: not offered

MLI-A7104 - Finnish for Foreigners 4

Permanent basic information

Name (FI): Finnish for Foreigners 4

Code: MLI-A7104

Scope: 3

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (FI):

Kurssin suoritettuaan opiskelija: 1) osaa puhua perusteellisemmin ajanvietteisiin ja harrastuksiin liittyvistä asioista, 2) pystyy osallistumaan työhön liittyviin keskusteluihin ja tehdä yleisiä työtehtäviin liittyviä tiedusteluja, 3) löytää tarvittavan keskeisen tiedon kurssin teemoihin liittyvistä asioista ja 4) ymmärtää ja osaa kirjoittaa lyhyitä työhön liittyviä viestejä.

Learning outcomes (EN):

Learning outcomes for this course; upon successful completion, students will demonstrate an ability to: 1) talk more extensively about their pastimes and hobbies, 2) participate in discussions regarding work and make enquiries about jobs, 3) find the main information they need on course topics, and 4) understand and be able to write brief texts concerning work.

Content (FI):

Kurssilla laajennetaan opiskelijoiden suomen kielen (esimerkiksi vapaa-aikaan, harrastuksiin ja työelämään liittyvää) perussanastoa ja kieliopin osaamista ml. monikkomuodot sekä menneisyyteen viittaavat muodot. Kurssiin sisältyvät keskustelut työelämään ja tiedonhakuun liittyvistä asioista sekä luku- ja kirjoitustaitoa parantavat harjoitukset.

Content (EN):

This course is designed to enable students to expand their basic Finnish vocabulary (e.g. leisure time, hobbies, work life) and knowledge of grammar, including plural forms and forms referring to the past. The course will also include conversations related to working life, information retrieval, as well as practicing reading and writing skills.

Registration selection criteria (FI):

Kurssi on suunnattu vain Mikkelin kampuksen opiskelijoille.

MLI-C1200 - International Arts Management

Permanent basic information

Code: MLI-C1200

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand the distinct challenges and opportunities of managing arts organizations, especially international organizations, 2) engage in program and artist management, 3) develop and manage marketing and PR initiatives in the arts, 4) explore how arts organizations can increase tourism and enhance local and regional economic activity, 5) evaluate funding and revenue models relevant to the arts, and 6) identify entrepreneurial opportunities within arts organizations.

Content (EN):

Arts organizations, ranging from art galleries to regional theaters to international music festivals, to name just a few examples, add significant value to their communities, regions and countries. They define and enhance cultural and national identity, provide significant employment, and generate considerable income. At some level, all arts organizations must focus on their local communities, but developing effective international appeal and scope presents increasing opportunities and challenges. This course will study the principles and practices of managing arts organizations. Emphasis will be placed on program and artist management, leadership, arts organizational structure, marketing and public relations, and financial management. Branding, audience development, and fundraising will also be addressed.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-C1202 - Integrated Marketing Communications

Permanent basic information

Code: MLI-C1202

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) appreciate the scope of marketing communications and tools available to marketers, 2) identify the structure of the communications industry and the complexities involved in media management, 3) formulate strategic responses to key issues in marketing communications and gain understanding of ethical considerations, 4) identify and evaluate marketing information required to plan and manage integrated marketing communications campaigns, and 5) analyze and evaluate data and present articulate recommendations that inform creative and effective marketing communications decisions.

Content (EN):

Marketing communications allow businesses to engage with consumers in order to fulfil their marketing and business objectives. Developing and implementing an effective marketing communications campaign is vital for the survival and growth of the companies in the digital age. An in-depth understanding of the tools and strategies of marketing communications is, therefore, crucial for business students. In this course, students will explore and understand the scope of marketing communications. The course will help them become well-versed in key terms, definitions, concepts, current theories and practices used in Integrated Marketing Communications. The course will cover the communication process, the main promotional tools of advertising, public

relations, sales promotion, direct marketing, event marketing, and online communications. The course will also include topical areas such as media planning, influencer marketing, and crisis communications.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-C1203 - Strategic Design Management

Permanent basic information

Code: MLI-C1203

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand how design has shifted from making things beautiful to serving as a strategic resource, 2) critically analyze design management and leadership practices in organizations already utilizing design principles, 3) reflect on how design-driven organizations create positive and negative value not only for their immediate stakeholders but for the broader societal context, 4) through hands-on learning, develop a solid understanding of how to collaborate with and learn from design professionals, and 5) apply design tools and methodologies to a real-life project.

Content (EN):

Business organizations today are quite different from what they used to be, and the pace of change will only accelerate in the future. Previously dominant organizations across industries are being replaced by more agile, customer-oriented challengers, and in this context, design has been one of the main drivers fundamentally disrupting our assumptions about how competitive advantages are created, sustained, and transformed. Understanding how design operates as one of the most critical sources for new competitive advantages is essential for students of international business. This course focuses on design as a source of innovations and competitive advantages from a managerial perspective. Zooming in on design practices, processes, and outcomes, students will collaboratively construct a solid understanding of how design can be seen as a strategic resource, through the use of case studies, hands-on learning, and projects.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-C1204 - Agile Project Management**Permanent basic information**

Code: MLI-C1204

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand and evaluate the differences and synergies between a typical “business as usual” context and implementing change through agile project management, 2) apply agile principles and approaches within complex projects in the context of digital transformation, 3) understand the agile management of quality, risks, time, cost, scope and benefit to deliver successful transformation outputs, and 4) define management products and critically evaluate their use within iterative projects.

Content (EN):

The future success of businesses will require firms and individuals to change and adapt in a rapidly evolving and highly competitive environment. Hence, any change process within a business will need to embrace the full spectrum of competences and approaches. Businesses must be agile and quick in creating temporary organization structures to implement such changes to survive, compete or lead. This course will introduce students to the study of agile project management in order to tackle increasing complexities and the need for adaptability. Agile methodologies encourage continuous user involvement, providing higher visibility and transparency within the agile project life cycle. This results in a sharper focus on creating business value. In addition, agile approaches are more iterative compared to traditional approaches, and thus better suited to projects with high complexity and shorter planning horizons. Students will be engaged in a variety of activities to understand the importance, challenges, and best practices of agile project management.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-C1206 - Data Visualization and Storytelling for Business**Permanent basic information****Code:** MLI-C1206**Scope:** 4**Course level:** Basic studies**Information updated for each curriculum period****Learning outcomes (EN):**

Learning outcomes for this course, upon successful completion, include the ability to: 1) Describe the purpose, importance, uses and ethics of data visualization for successful data-driven decision-making in international business, 2) Find, access and prepare data for use in visualization, 3) Apply visual analytics best practices to select and create interactive data visualizations (including charts, dashboards and data stories) that accurately and effectively communicate the data's trends, patterns and insights, 4) Use visual, perceptual and aesthetic concepts and practices for user-oriented design of data visualizations that tell stories with numbers across cultural boundaries, and 5) Prepare and present interactive data visualizations using globally recognized software.

Content (EN):

The rapidly increasing amount, speed and variety of data available to business today can either overwhelm or drive breakthrough decision-making. Data visualization is used in all functional areas of business to transform data into fuel for effective decision-making through the powerful medium of telling stories with data. Creating and communicating data visualizations are key to data literacy and are essential for success in international business as well as lifelong learning. This course provides an introduction as well as hands-on experience in data visualization and storytelling.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-C1207 - Services Marketing

Permanent basic information

Code: MLI-C1207

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand the nature of services as well as customer expectations and perceptions of services; 2) recognize the significance of services for competitive advantage; 3) apply approaches to services marketing, to diagnose and improve service provision; 4) understand how to integrate services with goods production; follow trends in the internationalization of services.

Content (EN):

Much of the world economy is dominated by services, yet manufacturing is often the primary focus of business studies. This course is designed especially for those students who may be interested in working in service industries and in addressing the distinct needs and challenges of managing services and delivering quality service to customers, also internationally. The primary theme of the course is that service organizations (e.g., banks, transportation companies, hotels, hospitals, educational institutions, and professional services) require a distinctive approach to marketing strategy both in its development and execution.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI-C1208 - New Product Development Using AI

Permanent basic information

Code: MLI-C1208

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) effectively use AI tools for ideation, market analysis, and product planning, showcasing how artificial intelligence can innovate traditional product development processes, 2) identify and analyze customer needs using AI, ensuring products are tailored to meet explicit and latent market demands in a dynamic business environment, 3) apply theoretical concepts through developing a case study presentation, emphasizing the balance among technology, user-driven design, sustainability, and manufacturability in product development, and 4) understand and apply principles of sustainable design and environmentally friendly practices, focusing on Design for Environment (DFE) strategies within the context of new product development.

Content (EN):

This course offers a comprehensive exploration of product innovation for engineered products, from ideation to execution. It integrates traditional lectures with AI-powered interactive exercises and case studies, covering topics like the Stage-Gate Methodology, AI ideation, customer needs analysis and sustainable design. The course focuses on theoretical knowledge and practical application, ensuring a well-rounded understanding of product development in modern business contexts.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI20A013 - Orientation to University Studies**Permanent basic information****Code:** MLI20A013**Scope:** 1**Course level:** Basic studies**Information updated for each curriculum period****Learning outcomes (EN):**

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand the practices and principles related to the learning environment at the Aalto Mikkeli Campus in order to successfully carry out university level studies in the program, 2) demonstrate a minimum IT skill level needed for university studies (including the use of the Word suite of applications, PowerPoint and Excel), and 3) increase awareness of stress and time management challenges in studies and ways of dealing with them.

Content (EN):

This course is designed to support students in planning and carrying out their studies. Students participate in an orientation to the program, which includes information on the personal study plans and the program's academic policies and practices. In addition, students are required to demonstrate a sufficient level of IT skills to manage their studies by passing computer applications tests. Finally, students are expected to develop their self-management in studies by participating in a stress and time management workshop.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI21A030 - Introduction to Management

Permanent basic information

Code: MLI21A030

Scope: 6

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) describe and apply fundamental concepts and theories in contemporary management, 2) distinguish in practice different decision-making processes, and management and leadership styles, and evaluate their effectiveness in various contexts, 3) analyze the importance of good communication for successful management practice, explain the effectiveness of communication acts and identify ways to improve communication effectiveness, 4) use theories of motivation to account for one's own and others behavior in management contexts, 5) identify how creativity and innovation can be used to improve an organizational process or product, and 6) demonstrate ethical and socially responsible decision-making and management practice.

Content (EN):

This course requires students to demonstrate in practice an understanding of four commonly stated functions of management: planning, organizing, leading and controlling. It provides a basic introduction to concepts, theories and practices relevant

to the exercise of management in contemporary organizations. Students are expected to read widely from academic literature provided in the course about management concepts and models and demonstrate their ability to apply concepts and models to enact choices about actions and make sense of the consequences of those actions. Sustainability is discussed in the course as an essential element of contemporary management, within a corporate governance framework.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI26C001 - Global Business Environment

Permanent basic information

Code: MLI26C001

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand the essential concepts and vocabulary of international business and the contexts in which it operates, 2) recognize the importance of national and international institutions and agreements in shaping the business environment, 3) know and understand different forms of global business enterprises and practices, 4) analyze opportunity and risk in global business, and 5) address global sustainability challenges in international business, particularly as framed by the Sustainable Development Goals.

Content (EN):

This course examines broadly the global environment for business while introducing key themes in the study of international business. The environment is studied on various levels, from national to regional to global, combining perspectives on the economy, politics and society, as well as recognizing sustainability issues. Particular emphasis is placed on the strategies of multinational enterprises, addressing topics such as risk assessment, entry modes and various forms of cooperation. In addition, the course examines the impact on international business of regional and global institutions such as the World Bank and EU as well as the role of free trade and other international agreements. International business approaches to global sustainability challenges are also discussed, for example, concerning innovation, entrepreneurship, ethics and the natural environment.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand essential concepts in environmental economics, 2) develop a critical appreciation of environmental economics as applied to exhaustible and renewable resources, 3) embed sustainability in economic decision-making to enhance environmental quality, and 4) relate environmental economics to real world issues and circumstances by solving practical problems and implementing policies.

Content (EN):

The primary focus of the course is to understand the nature, scope and key concepts of environmental economics. The course also addresses the existing relationship between the economy and the environment, including global challenges such as climate change and responses to them such as the United Nations Sustainable Development Goals (SDGs). In addition, students learn about property rights, market failures and externalities and are introduced to key techniques of environmental analysis. The theory of Optimal Allocation of renewable and non-renewable resources is also discussed. The key analytical tools and principles covered in the course are applied to current environmental challenges and practices in Europe and the rest of the world.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI26C715 - Global Supply Networks

Permanent basic information

Code: MLI26C715

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand the concepts and characteristics of global supply networks and evaluate their key performance drivers, 2) assess the synergies and trade-offs between supply network decisions and other functions of the firm such as marketing, HR, operations, accounting and finance, 3) address the coordination challenges that exist across supply networks and the barriers to collaboration, innovation and sustainability in global supply networks, and 4) identify and evaluate improvement opportunities that exist within supply networks in different industries; and propose alternatives that address the needs of involved stakeholders.

Content (EN):

A supply network is a sequence of value-adding activities performed by firms that range from sourcing the most basic raw materials from suppliers to delivering goods/services to the final consumer, including post-sale service activities. The coordination and integration of functions across the entire network are fundamental requirements, especially in global supply networks, where complexity and uncertainty levels are much higher. Therefore, effectively managing the supply network is a central issue for all levels of management in all types of industries. As global supply networks increase their reach and complexity, the demand for professionals with the capabilities and skills to manage them will continue to increase. This course aims to engage students in this discussion and exposes them to a variety of key issues associated with the management of global supply network such as: sourcing, operations, logistics, coordination, integration, collaboration, innovation, sustainability and the strategic implications of supply network decisions.

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand and apply basic concepts of costs and profitability, 2) employ basic and advanced cost tracing and assignment methods (job costing, process costing, traditional costing, ABC) to accurately determine profitability, 3) use tools for profitable operational and strategic decision making (cost volume profit analysis, pricing and product mix decisions, customer analysis), and 4) design a performance measurement system to implement strategy.

Content (EN):

Managing costs (understood as capacity and material inputs to the implementation of organizational strategy) is essential for achieving product and service profitability and ultimately organizational profitability. Understanding what gives rise to costs is hence essential for the survival of any kind of organization. This course focuses on developing an actionable understanding of profitability from the costing perspective. Students will

gain an intermediate-level understanding of profitability and profitability management from the costing perspective. They will also explore various cost assignment and tracing techniques, and discuss their applications, as well as their strengths and weaknesses. After arriving at a basic understanding of costing, we explore uses of cost information for profitable decision-making performance management.

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand the concept of innovation, 2) learn how to enhance and manage organization s creativity, innovation-based competitiveness and superior performance in the global economy, 3) know and understand the fundamentals of the innovation process, 4) be aware of the various institutions that may influence the innovation process, 5) learn how to manage the creation, protection, commercialization and capture of value from intellectual property rights (IPRs) and innovations, 6) gain insight

and competency how to lead and design innovation initiatives at international companies.

Content (EN):

An examination of the essential institutional frameworks (innovation systems), concepts, methods and practices in the context of innovation management and the global economy. The focus of innovation management is to allow both the small and large organizations to respond to an external or internal opportunity, and use its creative (intrapreneurial/entrepreneurial) efforts to introduce new ideas, processes or products in order to gain and maintain a competitive advantage in the global business world. The flow of technology and information and the interaction between people, enterprises and institutions is the key to an innovative process in order to turn an idea into a process, product or service on the market.

MLI26C728 - Capstone Course

Permanent basic information

Code: MLI26C728

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) comprehend the fundamentals of business administration and economics and the interdisciplinary nature of the study of international business, 2) recognize the complexity of global business operations in a dynamic competitive environment, eg the financial implications of strategic and operational decisions, 3) understand the challenges of driving financial performance while simultaneously delivering sustainable outcomes for all stakeholders, 4) demonstrate sufficient analytical and problem-solving skills by synthesizing theories and concepts and applying them effectively to international business problems, 5) engage in effective communication and team-working, as demonstrated in the simulation, and 6) reflect thoughtfully on learning, eg short-term on the reasons for adopting a strategy or making a decision in the simulation, and long-term on learning throughout the program.

Content (EN):

This course is designed to provide a capstone learning experience for BScBA students majoring in international business. The course is structured in particular around a simulation, in which student teams develop and execute strategies for a global company. Success in the simulation is measured using operational and financial indicators. Lectures highlight key issues in international business today, for example in the fields of strategy, finance and intercultural management; and support the integration and application of knowledge in the simulation. Sustainability is integrated into team decision-making at various stages of the simulation. Grading methods may include: regular analysis and reflection reports on the decision-making rounds; peer review of individual contributions to the team; and personal reflection on learning throughout the program.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

Permanent basic information

Code: MLI26C730

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand the key concepts, theories, and frameworks of consumer culture theory and interpretive consumer behavior; 2) apply these concepts, theories, and frameworks in critically examining and analyzing consumption in different international contexts 3) conduct consumer/market research and interpret the results for managerial implications.

Content (EN):

This course takes a multidisciplinary approach to the study of consumption, describing key theories from such fields as sociology, social psychology, social theory, cultural studies, material culture and cultural anthropology, as they relate to consumer culture. Distinct from psychologically oriented and experimentally driven sub-fields of consumer research (e.g. consumer psychology; consumer behavior), Consumer Culture research is mainly qualitative in its methodologies and methods, and relatively critical in its perspectives. Central streams of inquiry seek to advance consumer research knowledge by illuminating sociocultural processes and structures related to 1) consumer identity projects, 2) marketplace cultures, 3) the socio-historic patterning of consumption, and 4) mass-mediated marketplace ideologies and consumers' interpretive strategies.

Registration selection criteria (EN):

MLI26C738 - Global Game Industry**Permanent basic information**

Code: MLI26C738

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period**Learning outcomes (EN):**

Learning outcomes for this course, upon successful completion, include the ability to: 1) gain an up-to-date overview of the dynamics and trends of the game industry, its historical origins and future directions, 2) understand managerial practices in game companies and analyze specific matters associated with global games distribution, 3) evaluate game company internationalization strategies through platforms, 4) analyze game design and customer service from an ethical point of view, and design alternative, improved solutions based on this, and 5) experiment, through prototyping, with how gameful elements can be integrated across different organizational functions and industries.

Content (EN):

Since the beginning of the 21st century, the game industry has grown rapidly, surpassing the film and music industries in global revenue. Located at the intersection of technological innovation and artistic creativity, the game industry is constantly renewing itself and pushing forward existing business models. With the proliferation of Internet and digital distribution, the game industry is truly global, innovative and digital, providing a rich context for revisiting international business studies. This course will address various issues that are central to managing successfully a gaming firm, such as: business model and business development strategy; fundamentals of monetization and analytics of games, user acquisition approaches and marketing; localization and global expansion as well as ethical game design.

MLI26C739 - Social Media Analytics

Permanent basic information

Code: MLI26C739

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand the key metrics used for measurement in social media analytics and how they vary by platform, 2) evaluate the effectiveness and return on investment in a social media marketing campaign, 3) demonstrate knowledge of various ways to analyze and visualize data from social media platforms using Excel, SPSS, and/or other analytic tools, and 4) apply these analytic concepts to a company analysis and relate them to broader business outcomes.

Content (EN):

This course focuses on how to analyze data from social media networks in order to serve the strategic needs of business organizations. The course will begin with the basics of social media listening and the types of metrics used in social media platforms. Students will evaluate the effectiveness of social media ad campaigns using statistical analysis. Students perform analyses in Excel, SPSS, or other free online analysis tools on data from Facebook, Twitter, Instagram, Snapchat and/or other social media platforms. Students will also perform sentiment/content analysis and influencer analysis. Students will use real world data to practice analytic methods to convert social media data to insights into market structure, consumers perceptions of the brand, and marketing strategy. This course will help students prepare for professional analytics certifications.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand how ICT has changed the basis of competition in various industries, 2) understand how digitization can affect and transform any business, not only the traditional computing and telecommunications industries, 3) recognize how to meet and exceed customer expectations in a digital world, 4) understand how ICT can drive strategic change within a firm and across industries, and 5) recognize some of the larger trends in society to which ICT is contributing, from unemployment to the unequal distribution of wealth.

Content (EN):

This course focuses on the rapid change from autonomous vehicles to Artificial Intelligence and the Internet of Things and everything in between that has been brought about by Information and Communications Technologies (ICT) over the past few years. We are now living during a turning point in society, when individuals, firms and societies are becoming rapidly digitized, and thanks to the exponential nature of change in ICT, these changes will only accelerate over time. The adoption of digital methods of

doing business has become a prerequisite for success for firms in the digital age. Any firm that fails to respond appropriately to this paradigm shift will succumb to competition in the digital age. In this course, we explore how to manage and ride this change as individuals, as a firm or as a society. The course will address topics such as: Moore's Law and the second half of the chessboard; digitization and competitive advantage; infrastructure and e-commerce; cloud computing and Big Data; Internet of Things; artificial intelligence and the implications of all these changes in business and society.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

Permanent basic information

Code: MLI26C742

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) explain the global impact and implications that result from nature of the travel, tourism and hospitality industry structure, its diverse stakeholders and service-based products, 2) research key consumer characteristics and behaviors related to the consumption of

travel, tourism and hospitality products to support decision making by tourism planners and marketers, 3) describe how the unique nature of the industry influences the marketing mix for travel, tourism and hospitality products, 4) identify the critical components in the industry value chain and how to incorporate that insight into service quality, customer satisfaction and loyalty initiatives, and 5) describe how digital disruption creates opportunities in the travel, tourism and hospitality industry.

Content (EN):

This course involves both a strategic and tactical survey of the world's largest employer, the travel, tourism and hospitality industry. From a strategic perspective, the nature of the industry, its stakeholders and global role (i.e., in sustainable development) are explored. From a tactical perspective, the marketing implications of the unique nature of the travel, tourism and hospitality products and customers are highlighted.

MLI26C743 - Green Ventures

Permanent basic information

Code: MLI26C743

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand how a green venture is imagined, set up and operates in practice, 2) analyze how such ventures may lead to a purposeful life by helping move towards a flourishing society and planet, 3) appreciate how a regenerative local economy powered by green innovative ventures can result in a thriving self-reliant community, and 4) plan an imaginative green project in order to create and share value.

Content (EN):

There is an urgent need for a paradigm shift in the mission, purpose and values of enterprises to counter a range of social and environmental problems. This course aims to help students understand how value, both monetary and non-monetary, is created and shared through the development of purpose-driven green or sustainable ventures. A range of concepts such as real value, regenerative innovation, materialism, eco-design, impact investment and circular economy, are covered. Opportunities for entrepreneurs to flourish by developing meaningful solutions to reduce waste, foster conscious consumerism and limit biodiversity loss are discussed. The course also delves into the critical role that authenticity, belonging, rootedness and identity play in community-owned and place-based enterprises. Emphasis is on examining inspiring and creative ventures in sectors such as food, arts, crafts, tourism and renewable energy.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand principles of programming using the Python programming language, 2) use Python to collect data from various sources for analysis, 3) employ Python for data cleaning, 4) implement statistical and predictive models in Python using business data, 5) understand how to choose the correct statistical or predictive model based on the available data and business context, and 6) understand how the information resulting from data analysis leads to improved business decision-making.

Content (EN):

This course is intended to introduce the student to programming languages as tools for conducting data analysis, focusing on Python in particular. The course will cover basic principles of programming languages, as well as libraries useful in collecting, cleaning and analyzing data in order to answer research questions. Students will learn to use Python to apply forecasting tools and predictive models to business settings. The course will be divided between lecture and lab time, and labs will be focused on teaching students how to implement the programming techniques and statistical models discussed in lectures.

Registration selection criteria (EN):

MLI28A020 - Principles of Finance

Permanent basic information

Code: MLI28A020

Scope: 6

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) know and understand basic concepts and vocabulary of finance, 2) identify and assess the financial health of a company, 3) predict the financial position of a company in short-term frameworks, 4) understand and incorporate time value of money in decision making, 5) understand and evaluate expected benefits and risks of investment decisions, 6) understand and estimate a company's cost of funds, 7) evaluate capital expenditures proposals, and 8) understand valuation models of corporate securities.

Content (EN):

This course is intended to be a comprehensive introduction to the principles of financial management. Emphasis is given to major functions of financial management as they pertain to valuation, risk and risk-return trade-off, financial analysis and planning, and capital budgeting. The course will begin with discussions of the various fields of finance, the basic concepts of financial statements, security markets, interest rates, taxes, risk analysis and the time value of money. That knowledge will then be used to discuss several topics including, but not limited to, bond and stock valuation, the cost of capital, capital budgeting, capital structure and debt and equity valuation.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI31A002 - Principles of Economics

Permanent basic information

Code: MLI31A002

Scope: 6

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) know and understand the key principles of economics underlying the market and the economy, 2) calculate real economic variables, such as real GDP, inflation and unemployment rates and be familiar with important international economic databases, 3) know and understand how fundamental economic theory applies to international business, 4) understand how aggregate variables such as inflation and unemployment behave and how the government and Central Banks can influence their behavior, 5) understand the impact of economic fluctuations at a domestic and international level, and 6) use economic principles to analyze the problems that arise from the usage of finite resources, and explore efficient and sustainable solutions consistent with long-run goals.

Content (EN):

The purpose of this course is to introduce students to the principles of economics. It distinguishes between microeconomics and macroeconomics with a stronger emphasis on the latter. The microeconomics section addresses the topics of scarcity, opportunity cost, demand and supply, elasticity, cost theory and market structures. The macroeconomics section addresses topics such as trends in real economic variables, production and growth, theory of income determination, the consumption function, fiscal policy and monetary policy. The course will address issues of sustainability presuming that resources are finite and should be used with a view to long-term priorities and consequences.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

Teaching Periods: 2024-2025 Module 6, Module 7 / 2025-2026 Module 6, Module 7

MLI31C020 - Intermediate Microeconomics

Permanent basic information

Code: MLI31C020

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) apply standard microeconomic tools to explain and predict the behavior of individual consumers and firms, 2) apply microeconomic theory to explain market structures and the behavior of firms within specific industries, and 3) compare how markets are organized under perfect competition versus a monopoly, duopoly or oligopoly and the outcomes of decisions made in these markets.

Content (EN):

This course builds on the basic knowledge gained in an introductory economics course and develops further microeconomic topics and theories using standard microeconomic models. The topics covered include: consumer theory, utility and indifference curve analysis; the theory of the firm and cost analysis; market structures, including models of monopoly, duopoly and oligopoly; and pricing strategies. The course will also introduce students to public economics and the concept of externalities. The efficient allocation of resources is emphasized throughout the course.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI31C030 - Intermediate Macroeconomics

Permanent basic information

Code: MLI31C030

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) apply macroeconomic models to problems of short-term and medium-term equilibrium, 2) analyze the determinants of output, employment, and growth in the long run, 3) critically appraise the influence of policy on the economy, and 4) understand the significance of developments in the international system, for example economic and monetary union.

Content (EN):

This course builds on knowledge gained in an introductory economics course by deepening students competence in using macroeconomic models to explain the determination of aggregate output, money, prices, inflation, interest rates, employment and growth. The impact of monetary and fiscal policy on the economy will also be discussed. Other topics addressed include short-, medium- and long-term equilibrium models, international trade and borrowing, open economy, exchange rate theory, economic and monetary union, and Keynesian versus neoclassical economic theories.

The course is intended to complement microeconomics, the study of the economic behavior of individual consumers, firms, and industries.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI32A130 - Introduction to Business Law

Permanent basic information

Code: MLI32A130

Scope: 6

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) describe the sources and norms of Finnish and European Union law, 2) understand the principles and applications of contract as compared to tort law, 3) understand the principles and applications of competition, company and intellectual property law, 4) identify the fora and procedures for commercial dispute settlement, 5) understand the principles and applications of employment law and provision of service, 6) grasp the general principles of national and international taxation, and 7) analyze the legal aspects of social sustainability.

Content (EN):

The purpose of the course is to introduce students to the foundations of Finnish business law. It also addresses the correlation of Finnish law to European Union law and their implications for international business. By the end of the course students will be able to identify legal issues relevant to business as well as demonstrate competence in legal research.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI34A040 - Business Mathematics with Excel Applications**Permanent basic information**

Code: MLI34A040

Scope: 6

Course level: Basic studies

Information updated for each curriculum period**Learning outcomes (EN):**

Learning outcomes for this course, upon successful completion, include the ability to: 1) solve simultaneous equations, 2) understand linear and nonlinear functions and utilizing graphical methods for visualizing such functions, 3) understand the core principles of financial mathematics, including simple and compound interest, internal rate of return, depreciation and net present value, 4) understand the rate of change of

functions and the core principles behind differential calculus (including applications), 5) understand optimization in the presence of constraints, 6) understand linear programming concepts, including the use of graphical methods, 7) utilize the different concepts learned to model and solve some practical business problems, including problems in business finance, economics and operations management and 8) use Microsoft Excel throughout the course to show how these principles can be creatively applied in real life problems.

Content (EN):

A fundamental course in business mathematics emphasizing concepts and interpretation, which develops the core mathematical foundations for specialized business and economics courses. Given the widespread use of Microsoft Excel in business today, the course will also spend time on applying those mathematical concepts using the functional and programming capabilities of Excel.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI36A020 - Introduction to Statistics

Permanent basic information

Code: MLI36A020

Scope: 6

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) know and select a tool or measure appropriate to the task and to the measurement nature of the variables, 2) use basic descriptive statistics of central tendency and cross-tabulation to summarize data, 3) learn how to visually present data, such as graphing, table construction, and decision trees, 4) understand populations and sample sizes and their effect on statistical results, 5) use statistical estimation, correlation, and classical statistical tests for simple and multiple regression analyses, 6) understand the use of inferential statistics as a method of decision-making when faced with uncertainty, 7) apply hypothesis testing with confidence intervals for categorical and continuous variables, and 8) use data analysis software, such as the Excel data analysis tool pack, to analyze data and present visualizations of it.

Content (EN):

In this course, the student is introduced to the subject of business statistics to explore quantitative analyses in business, the basic procedures in problem solving, and the sources and types of data used by business firms. Basic statistical analysis will be used by the student to summarize and describe numeric data and to perform inferential statistical analysis to test hypotheses. Emphasis will be placed on learning how to select the appropriate tool to solve problems associated with statistical uncertainty.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI61A130 - Business Communication

Permanent basic information

Code: MLI61A130

Scope: 3

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) analyze communication contexts and prepare effective communication strategies to manage them, 2) write coherent and convincing, reader-friendly texts, 3) plan and deliver clear, focused and engaging business presentations, including pitches, 4) negotiate effectively by employing relevant strategies and tactics, and 5) engage more effectively in teamwork.

Content (EN):

Business Communication gives students a clear insight into what constitutes effective oral and written business communication in a fast-paced global business environment, in contexts ranging from large organizations to start-ups. The course is highly interactive and task-oriented. Case analyses, written assignments, negotiation simulations, as well as individual and team presentations, will allow students to practice the theories and key concepts introduced during the course. Peer and instructor feedback will give students a greater awareness of their present communication skills, and an indication of how their performance can be enhanced.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

MLI61C630 - Academic Writing

Permanent basic information

Code: MLI61C630

Scope: 6

Course level: Intermediate studies

Information updated for each curriculum period

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) recognize the purposes and methodologies of various genres of academic writing; 2) adjust writing style depending on the audience and purpose; 3) use academically appropriate vocabulary, grammar, punctuation, and format; 4) correctly proofread and edit written materials; and 5) locate tools and aids for self-development of writing skills.

Content (EN):

This course aims to develop the kind of writing skills students will need during their university studies. The emphasis is on integrating source literature into argumentation in essays, reports and theses. Students will therefore practice developing thesis statements, as well as writing annotated bibliographies, article summaries and literature reviews. Special attention will be paid to academic style, including tone, voice, academic language, and the relationship between the writer and the audience.

Registration selection criteria (EN):

The course is targeted only for the Mikkeli Campus students.

Learning outcomes (FI):

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) follow language which is slowly and carefully articulated, with long pauses to assimilate meaning, 2) understand simple spoken sentences or connected phrases concerning one's home, work and studies, 3) recognize concrete information (e.g. places and times) on familiar topics encountered in everyday life, 4) introduce oneself and other people at a basic level (names, age, activities), 5) make actionable demands to satisfy needs such as asking for food, expressing simple psychological states, as well as accepting and refusing, 6) understand very short, simple texts, a single phrase at a time, picking up familiar names, words and basic phrases, and rereading as required, 7) give information about matters of personal relevance using simple words, structures, and basic expressions, and 8) begin building a vocabulary around business and culture in German.

Content (FI):

Content (EN):

This course introduces students to speaking, listening, reading and writing in German with an emphasis on speaking and listening. Students are introduced to the basic vocabulary and grammar needed for communicating in daily life and in some business situations. They also become aware of some elements of culture in countries where German is spoken.

Registration selection criteria (FI):

The course is targeted only for the Mikkeli Campus students.

Learning outcomes (FI):

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) follow language which is slowly and carefully articulated, with long pauses to assimilate meaning, 2) understand simple spoken sentences or connected phrases concerning one's home, work and studies, 3) recognize concrete information (e.g. places and times) on familiar topics encountered in everyday life, 4) introduce oneself and other people at a basic level (names, age, activities), 5) make actionable demands to satisfy needs such as asking for food, expressing simple psychological states, as well as accepting and refusing, 6) understand very short, simple texts, a single phrase at a time, picking up familiar names, words and basic phrases, and rereading as required, 7) give information about matters of personal relevance using simple words, structures, and basic expressions, and 8) begin building a vocabulary around business and culture in Spanish.

Content (FI):

Content (EN):

This course introduces students to speaking, listening, reading and writing in Spanish with an emphasis on speaking and listening. Students are introduced to the basic vocabulary and grammar needed for communicating in daily life and in some business situations. They also become aware of some elements of culture in countries where Spanish is spoken.

Registration selection criteria (FI):

The course is targeted only for the Mikkeli Campus students.

Permanent basic information

Name (FI): Basics in Business Spanish 2

Code: MLI65A002

Scope: 3

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (FI):

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to: 1) understand phrases and expressions related to concrete areas such as personal and family information, shopping, local geography, and employment, provided the speaker articulates clearly and slowly, 2) give a simple description or presentation of people, living and working conditions, daily routines, and likes/dislikes, 3) express opinions when addressed directly in a formal meeting, provided one receives help with formulation and can ask for repetition of key points if necessary, 4) understand short, simple texts on familiar matters which consist of high frequency, every-day or job-related language, 5) produce a series of related phrases and sentences linked with

connectors such as “and”, “but”, “because” and “therefore”, and 6) know some typical features of the culture and business life in countries where Spanish is spoken.

Content (FI):

Content (EN):

This course will build on student knowledge of basic Spanish grammar and vocabulary. Students will gain more experience in listening, speaking, reading and writing Spanish for daily life and to some extent for business contexts. In addition, students will gain deeper knowledge of culture in countries where Spanish is spoken.

Registration selection criteria (FI):

Information updated for each curriculum period

Learning outcomes (FI):

Learning outcomes (EN):

Learning outcomes for this course, upon successful completion, include the ability to:

1) understand the main points made in clear standard spoken language on matters regularly encountered in business settings, 2) sustain a short conversation about one's field of interest, 3) understand the main content of straightforward business texts and articles, 4) read straightforward factual texts on subjects related to business with a satisfactory level of comprehension, 5) produce straightforward connected texts on a range of familiar subjects by linking a series of shorter discrete elements into a linear sequence, 6) produce short, simple texts on business topics, using simple language to list advantages and disadvantages, 7) produce brief reports on business topics in a standard conventional format, which pass on routine factual information and state reasons for action, and 8) communicate about some aspects of business culture in the countries in which Spanish is spoken.

Content (FI):

Content (EN):

In this course, students will expand their knowledge of Spanish grammatical structures learned in previous courses and will further develop their Spanish communication skills for business contexts. Students will become familiar with common business norms and practices in countries where Spanish is spoken. The course will focus equally on listening, speaking, reading and writing skills.

MLI71A100 - Suomenkielinen yritysviestintä

Permanent basic information

Name (FI): Suomenkielinen yritysviestintä

Code: MLI71A100

Scope: 3

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (FI):

The course is taught in Finnish.

Kirjoitusviestinnän osiossa opiskelija saa tietoa yritysten viestinnän käytänteistä.

Opiskelija oppii ymmärtämään viestinnän merkityksen talous- ja yrityselämässä ja saa tietoa viestien tulkintaan vaikuttavista tekijöistä, viestinnän visuaalisuudesta ja

multimodaalisuudesta sekä sosiaalisesta mediasta yritysten viestinnässä. Opiskelija oppii erottamaan vakuuttavan ja suostuttelevan argumentoinnin sekä oppii analysoimaan ja kirjoittamaan yritystekstejä.

Puheviestinnän osalta opiskelija saa tietoa siitä, miten asiantuntijuus rakentuu puheviestinnässä. Hän saa tietoa kommunikoinnin psykologiasta ja palautteen merkityksestä puhujana kehittymiselle. Opiskelija oppii tiedostamaan oman ryhmä- ja viestintäkäyttäytymisen piirteet. Opiskelija oppii pitämään informatiivisen puheesityksen, jonka hän on suunnitellut ja toteuttanut huomioiden kuulijakunnan, tilanteen ja esityksen tavoitteen.

Learning outcomes (EN):

Content (FI):

The course is taught in Finnish.

Kurssi perehdyttää opiskelijan talouselämän viestinnän keskeisiin käsitteisiin ja teoreettiseen taustaan sekä suomalaisen yhteiskunnan viestinnällisiin erityispiirteisiin. Kurssilla perehdytään luentojen ja harjoitusten avulla talouselämän kirjoitus- ja puheviestintätilanteisiin sekä niissä tarvittaviin viestintätaitoihin. Puheviestinnän harjoituksissa analysoidaan puhe-esitysten eri muotoja, määritellään asiantuntijaesitysten keskeisiä kriteerejä sekä perehdytään sanallisiin ja sanattomiin vaikuttamiskeinoihin. Yksilötehtävien ja ryhmäkeskustelujen avulla harjoitellaan vuorovaikutustilanteita. Harjoituksissa voidaan käyttää videointia. Kirjallisen yritysviestinnän osiossa analysoidaan tilanteenmukaista yritysviestintää ja harjoitellaan yritys- ja asiantuntijatekstien kirjoittamista.

MLI72A100 - Swedish Business Communication

Permanent basic information

Name (FI): Ruotsinkielinen yritysviestintä

Code: MLI72A100

Scope: 3

Course level: Basic studies

Information updated for each curriculum period

Learning outcomes (FI):

The course is taught in Swedish.

Opiskelijalla on kurssin suoritettuaan sujuva ruotsin kielen kieli- ja viestintätaito. Opiskelijalla on myös julkishallinnon henkilöstöltä vaadittava ruotsin kielen taito (ks. kielitaitolaki 424/2003). Kurssilla opitaan selviytymään talouselämän eri tehtävistä ruotsiksi niin kirjallisesti kuin suullisesti, tuottamaan kirjallisia ja suullisia tekstejä talouselämän keskeisiltä aloilta, ymmärtämään alan ruotsalaisia ammattilehtiä ja muiden medioiden tarjontaa ruotsiksi sekä toimimaan vuorovaikutteisesti. Kurssilla arvioidaan sekä kirjallinen että suullinen kielitaito.

Learning outcomes (EN):

Content (FI):

Opintojakso Ruotsinkielinen yritysviestintä/Swedish Business Communication muodostaa kauppatieteiden kandidaatin tutkintoon sisällytettävät ruotsin kielen vähimmäisopinnot. Kurssilla luetaan itsenäisesti talouskielen tekstejä ja tehdään omatoimisesti teksteihin pohjautuvia suullisia ja kirjallisia harjoituksia sekä syvennetään talouden erikoiskielen osaamista suullisesti ja kirjallisesti. Kurssilla kommunikoidaan vuorovaikutteisesti sekä talouselämän että sosiaalisen elämän tilanteissa.

Content (EN):

Registration selection criteria (FI):

Kurssi on suunnattu vain Mikkelin kampuksen opiskelijoille.
