What is a stand like?

An elevated vertical table and electrical outlet are provided for exhibitors. In addition, a roll-up, for instance, fits well into the area. There is no need to take other stand structures along, and they may not necessarily even fit into the space. Building the stands begin at 7:45am on the event day.

How are the stands situated?

The stands are situated in the upper foyer on Dipoli’s second floor, allowing accessibility to the auditorium (panel and students’ posters).

Is there an on-the-spot Internet connection?

The wireless Aalto Open network operates at the Otaniemi campus, which provides access to all without the need for user IDs and passwords.

Where can I park my car and how do I get there?

The address for Dipoli is Otakaari 24 and in the Otaniemi campus map Dipoli is number 19. Parking spaces can be found in front of the building and next to Otahalli as you drive past Dipoli from Luolamiehentie Road. You can get an Aalto University parking permit from the Info. Please note that Otaniemietie is cut off. From the direction of Ring 1, you can get to the place easiest from Teknikantie. The closest entrance is the festive door at the side of Luolamiehentie, but the main door can be used as well.

If arriving by Metro (Aalto-yliopisto, Aalto University station), exit the underground at Otaniemietie.

Where can I leave my jacket and other things?

Unfortunately, Dipoli does not offer a supervised cloakroom. An exclusive recreational area called Poli is reserved for exhibitors, where outdoor wear, substitute footwear and other things can be left. There is a door in the area, but it is not locked. There is a general cloakroom for students, and coded lockers can be found in the lower foyer.

Where can I have lunch?

Breakfast is served in the morning, and the School of Chemical Engineering invites the exhibitors for lunch. Others can enjoy lunch at, for example, Dipoli’s Reima Restaurant, which is located on the same floor.
