Horrifying (Humorous) Health and Safety Videos

Our 3D & Jewellery Team

We had a dilemma...

Convincing 1st Year BA students to take Health and Safety in our 3D workshop seriously and stay alert during our H&S inductions and presentations...

Answer:

Handing over to the students (using a lot of props, wigs and fake blood) who did their own version of H&S videos.

This not only served as a great 'ice breaker' for 1st year students, but it also got them engaged and excited about the (sometimes slightly dry) yet important topic of Health and Safety.

H&S videos...

Discussion of approach...

I would also be interesting to hear about how other institutions tackle H&S inductions and awareness...

Thank you! :0)
