VIA Collaboration quick start guide

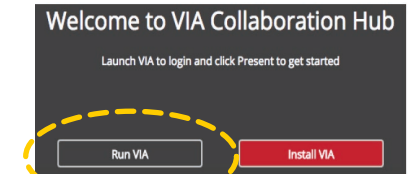

1. Connect your device to Aalto or Aalto Open Wifi

2. Download the VIA Application (if not installed)

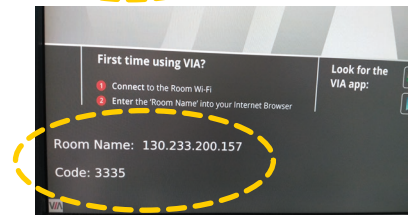

Win & Mac

- Enter the room name / IP address into your browser
- Select Run Via to download the application

Android & iOS

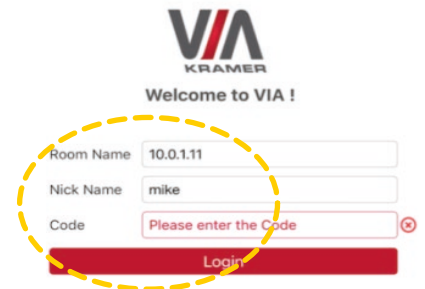

- Install the VIA App from Play Store / App Store
- You can also use this QR code

You can find the room name on the lower left of the main display screen.

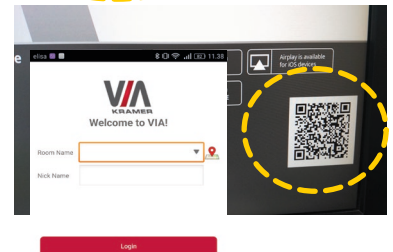

3. Run the application and login using

- Room Name
- Room Code
- Your nickname

For security reasons the room code changes every 30 minutes.

With your mobile device you can also log in by QR scanning. Click the QR code icon on the lower right corner of the app and read the QR on the left corner of the screen. With QR login the room code authentication is bypassed.

4. Click Present button on your VIA application to start presenting. Once you have finished displaying your content, select **Stop Presenting** to remove your content from the display.

To access other available functions of the wireless collaboration system please select the Features tab on the application dashboard.

+ Two ways to play video from VIA:

File Searching Media Files

- Select "Multimedia" from features menu.
- Click Add Media in the lower left corner.
- Select and open a video you would like to add
- Doubleclick the media file to play the video

Drag/Drop Media directly to VIA

- Drag media file to the VIA logo on the lefthand side of the VIA dashboard. Once released, the video automatically starts playing
