Functionality of the new portal

Please note that you make all the changes in acris.aalto.fi

Portal profile

1. You can choose to show or hide your collaboration map.

2. Choose which affiliations you want to show in your personal profile.

   Select the organisational unit affiliations to be shown on your profile on the Pure Portal. By default, all your active organisational unit affiliations are shown.
   If you hide an affiliation it may still be present on the Pure Portal on other pages, but it is not shown on your personal profile.

3. Metrics

   We have disabled H-index and aggregated citations in the personal profile. Scopus citations are shown with publications.
Highlighted content

You have the possibility to highlight your most important publications, activities, prizes, press/media and projects.

If you choose not to highlight content, the newest content is used.

Fingerprints

The Fingerprint Engine mines the text of documents, i.e. publication abstracts, project summaries, patents – to create an index of weighted terms which defines the text, known as a Fingerprint visualization. These fingerprints are used to map content. The Elsevier Fingerprint Engine uses a variety of thesauri to support applications pertaining to different subject areas. The total number of concepts is over 700,000 distinct concepts.

You can choose which fingerprint concepts to show in your personal profile.
