Aalto University

Aalto University

Design a tailor-made experience for your students

At Aalto University we are shaping a sustainable future. We build educational experiences that are both academically rigorous and unforgettable for your students.

We want to welcome your students to experience multidisciplinary and challenge-based education at Aalto University.

Our custom programs prepare future leaders to tackle grand challenges through solutions for sustainability, radical creativity and an entrepreneurial mindset. All of our students get to combine academic interests with real world experiences.

Your students will be taught by top faculty and mentored by experienced staff at Aalto University. Your students will be surrounded by a vibrant, diverse and international community dedicated to building transformative learning experiences.

I hope we can welcome your students to Aalto University, either on-campus or virtually!

Multidisciplinary custom programs

Aalto University is founded on high-quality research, education, impact, and shared values of responsibility, courage, and collaboration.

At Aalto University, we are committed to identifying and solving grand societal challenges and building an innovative and sustainable future. We offer teaching and learning that is future-led and strongly emphasises collaboration with industries and society. Our highly international university is home to 12000 students and a staff of 4500.

Experience Aalto all-year-around

We offer universities the opportunity to collaborate through custom academic study programs all-year around at Aalto University campus in Espoo, Finland.

We design the study program in collaboration with you to ensure that the program is fully fit for your students' needs. We work with you to design on-campus or online programs with relevant content, faculty and learning methods.

Combine an academic experience with the
best Finland and Helsinki has to offer.

Social Program

Our social program offers the perfect opportunities for networking and exploring Helsinki and Finland. We are also happy to combine your experience with shorter trips to for example Lapland or Tallinn to make the most out of your stay! A virtual social program is also available.

Welcome evening and Farewell party

We have previously hosted our welcome evenings in Allas Sea Pool, a beautiful seaside terrace in downtown Helsinki, as well as in the Rooftop Bar of Clarion Hotel Helsinki.

Suomenlinna Sea Fortress

This beautiful group of islands was built as a sea fortress, but is nowadays a unique residential area. Suomenlinna has been a UNESCO World Heritage Site since 1991.

Trip to Tallinn

The Estonian capital of Tallinn is only a couple of hours of comfortable ferry travel away from Helsinki and offers everything from a medieval Old Town to fine dining at its best.

Challenge-based learning at Aalto University

Challenge-based learning offers students the opportunity to collaborate with local and global companies and organisations. The real-life challenges and learning practices aligned with work-life environments increase the students' employability and shortens the gap between studies and career.

Relevant projects provide authentic learning experiences and allow students to explore, discuss, and meaningfully construct concepts and relationships.

Alumni testimonials

Tyler Spring attended the Digital Business Master Class by Aalto University Summer School and has successfully translated the course insights into positive changes at his work.

“Everything about the program is extremely well done, from the facilities to the coordinators, company visits, cultural outings and lectures, it all comes together as an experience that you won’t forget.

Make sure you take the time to explore all of the great things that Helsinki has to offer – especially the restaurants and nightlife. The program provides ample time on the weekend to explore outside of Helsinki, and I’d highly recommend taking the short ferry to Tallinn.”
