Shaping the future

Aalto University is a multidisciplinary community where science and art meet technology and business.

Aalto University is on a mission to shape the future using its unique blend of knowledge and expertise that originates in science, art, technology and business. Through a variety of approaches, including multidisciplinary initiatives and strong basic research, we identify and solve complex challenges and educate future visionaries and experts.

Aalto University comprises six schools, four of which focus on science and technology. Aalto University offers inspiring learning environments and educates game changers in the following fields and schools of science and technology.

School of Chemical Engineering (Aalto CHEM): biomass refining, biotechnology, chemical and process engineering, chemistry, fibre and polymer engineering, functional materials, sustainable metals processing.

School of Electrical Engineering (Aalto ELEC): automation, bioinformatics, communications engineering, electrical engineering, electronics and nanotechnology, space science.

School of Engineering (Aalto ENG): civil engineering, energy technology, geo-informatics, mechanical engineering, real-estate economics, spatial planning and transportation engineering, water and environmental engineering.

School of Science (Aalto SCI): computer science, engineering physics, industrial engineering and management, information networks, life science technologies, mathematics and operations research, biomedical engineering and neuroscience, entrepreneurship and innovation studies.

Facts and figures 2018

Professors: 389 (24% int')
Students: 17 451
Int’l Master’s students: 24%
Int’l Doctoral students: 31%
Incoming exchange students: 998
Outgoing exchange students: 842
### Numerical Grade (Aalto University) | ECTS Grade | Definition
---|---|---
5 | A | Excellent
4 | B | Very Good
3 | C | Good
2 | D | Satisfactory
1 | E | Sufficient

### Academic Information

**Application and Admission**

**Application deadlines for incoming exchange students**
30 April for studies in the autumn term or
the full year 15 October for studies in the spring term

**Application information for exchange student**

After being nominated, the applicant will receive instructions to make the online application.

The applicant must provide an official transcript of records, a study plan or learning agreement; a CV, and either an English language proficiency certificate (IETLS 6.5, TOEFL 80 or equivalent) or a statement by an English language teacher.

**Visa requirements**

The student’s nationality and length of stay determine the necessity of a visa or a residence permit. Visa/Residence permit applications, when required, should be made immediately on receiving the letter of admission, and travel arrangements should begin only after the visa/residence permit is issued. Finnish Immigration Service: migri.fi/studying-in-finland.

**Student union**

Exchange students may join the Aalto University Student Union, AYY. With membership students can get several benefits such as health services, discounts and student-priced meals. The student union organizes many free-time activities from parties and field trips to sports and cultural activities. Aalto University Student Union: ayy.fi/en/

**Health insurance and health services**

International students are expected to have their own health insurance. Health insurance is a prerequisite for obtaining a residence permit. In addition to private insurance, European students are advised to obtain the European Health Insurance Card from their home country.

**Orientation and student tutoring**

At the beginning of each term, new students participate in the orientation days where local student tutors (“budgie”) guide new students in their first steps at Aalto University and help integrate them into the vibrant student culture at the Otaniemi campus.

**Student culture**

The student union is associated with around 200 clubs with something for everyone: sports, music, politics and brewing beer to mention a few interests. Additionally, participating in the dozens of fun activities is an essential part of studying in Finland. Annual highlights include May Day (Wappu) festivities and the Shore to Tuesday raiding competition (Laskaiherha).

Each field of study has a student guild, which organizes a multitude of social activities: sauna evenings, dinner parties (stilt), events with prospective employers, student magazines, and sports teams that compete against each other. Participating in guild activities is one of the best ways to get to know Finnish students.

**Campus and housing**

Aalto University’s Otaniemi campus is located a short metro ride from downtown Helsinki (12 minutes). The main student housing provider is HOAS (Foundation for Student Housing in the Helsinki Region) and AYY the student union. Student apartments typically consist of 3-5 bedrooms, a shared living room, a kitchen and bathroom. Students apply for housing directly through HOAS and AYY.

The new renovated spaces provide a unique study environment.

**Living expenses**

- Rent in student housing: 350-600 €/month
- Rent in private market: 600-800 €/month
- Public transportation: Monthly travel card for students from about 30 € to 80 €
- Food and daily consumer goods: 150-200 €/month
- Student lunches at campus cafeterias: Around 3-5 €/meal

---

**Aalto Festival** is the university’s spring highlight.

**International joint master’s programmes**

- Advanced Materials for Innovation and Sustainability (EiT RawMaterials)
- European Mining, Minerals and Environmental Program (EIT RawMaterials)
- Environmental Pathways for Sustainable Energy Systems (HELIX EiT InnovEnergie)
- ICT Innovation (EiT Digital)
- Nordic Master in Cold Climate Engineering
- Nordic Master in Environmental Engineering
- Nordic Master in Innovative Sustainable Energy Engineering
- Nordic Master in Maritime Engineering
- Nordic Master in Polymer Technology
- Security and Cloud Computing (ISC Claude) (Erasmus Mundus)
- Space Science and Technology

**Doctoral education**

Aalto University has four-year doctoral programmes in the field of technology: Doctoral Programme in Chemical Engineering, Doctoral Programme in Electrical Engineering, Doctoral Programme in Engineering, and Doctoral Programme in Science. More on the programme: aalto.fi/studies/doctoral_admissions/

---

**Studies**

Bachelor’s degree studies are organised in three-year programs (180 ECTS) and master’s degree studies in two-year programmes (120 ECTS). All master’s programmes are taught in English.

Studying full-time means working 1600 hours per year, which corresponds to 60 ECTS credits (one ECTS credit represents approximately 27 working hours). A full-time workload per term for undergraduate and graduate students is 30 ECTS. Most courses carry 5 ECTS credits, which includes all the work required to complete a course: lectures, projects, cases, labs, exercises, exams and independent studies. Study achievements are graded on a scale of 1 to 5 or pass/fail.

**Academic schedule**

- Autumn term, teaching and exams: September-December, periods I and II
- Spring term, teaching and exams: January-May, periods III, IV and V

**Tuition fees**

- Non-EU/EFTA bachelor’s degree students: 12 000 euro/year
- Non-EU/EFTA master’s degree students: 15 000 euro/year
- Exchange students: No tuition fee

**Multidisciplinary opportunities**

Aalto University offers concrete product development projects in multidisciplinary teams. Aalto Ventures Program courses provide students with diverse steps into entrepreneurship and innovation. University-wide art and business studies offer students a chance to meet students and teachers from different fields.

**Aalto Bachelor’s Programme in Science and Technology in English**

- Data Science
- Digital Systems and Design
- Chemical Engineering
- Computational Engineering
- Quantum Technology
Choose Aalto University, Helsinki and Finland

What makes Aalto University unique?
Emphasis on multidisciplinary teaching and learning and introducing students to entrepreneurial skills together with a wide variety of inspirational spaces as well as events in collaboration with external stakeholders, such as industrial partners, are the key ingredients of Aalto University’s uniqueness.

Startup scene
Aalto University fosters a genuine, student-driven startup scene. Startup Sauna, Aalto Entrepreneurship Society, the Slush community, and the Summer of Startups programme attract an international audience to the Aalto University ecosystem, from which 70–100 new companies spring up every year. Autumn term exchange students can experience the world-class start-up event SLUSH by volunteering.

Helsinki and the Capital Region
Aalto University campus is located in Otaniemi, Espoo, right next to Helsinki on the southern coast of Finland. Helsinki is the capital of Finland and its largest city with a population of over 650,000. The capital region has a total population of 1.5 million. Helsinki is rich in culture and offers beautiful outdoor environments; islands, forests and lakes are a stone’s throw from the city.

Reasons to choose Finland
Finland, situated in Northern Europe, is neighbours with Sweden, Norway and Russia. A republic and a member of the European Union, it has about 5.5 million inhabitants. Its official languages are Finnish (89%) and Swedish (5.3%), and most Finns speak fluent English. Finland’s currency is the euro. Finland’s education system is one of the most advanced in the world, and it has both a high standard of living and quality of life. The Finnish population, by international standards, is well educated, and education is highly valued in the society.

Finland, ranked
» Finland is the happiest country in the world.
  Sustainable Development Solutions Network, World Happiness, Report 2019
» Finland is the most stable country in the world.
  The Fund for Peace, Fragile States Index 2018
» Finland is the safest country in the world.
  World Economic Forum, The Travel & Tourism Competitiveness, Report 2017
» Finland has the third least corruption in the world.
  Transparency International, Corruption Perceptions Index 2017
» Finland is the best country in the world in a comparison of human wellbeing.
  Sustainable Society Index, Main results 2016
» Finland is the best country in protecting fundamental human rights in the world.
  The World Justice Project, Rule of Law Index 2017–2018

Art and creativity
Art, design and creativity drive innovation and entrepreneurship. They also radically question and challenge the norm in our society and culture.
