

# SCHEDULE FROM PRE-EXAMINATION TOWARDS GRADUATION, DOCTORAL PROGRAMME IN ELECTRICAL ENGINEERING

Please check the required appendices and other details for every step in Into.

After each decision, you will also receive instructions for the following step. The decision categories (mentioned at the bottom) are described in more detail in Into.

These times are minimum times, for example summer season and national holidays extend processing times. No decisions are made in July.

\* If the decision is in category A, no corrections are required and process moves to step 7. In category B, the student has 3 months time to make the corrections and in category C, 1 year. In category D, the process returns to step 3.

\*\* If the required corrections were minor (category B), the permission on the 1st round was already given as conditional, and only the DPC Chair will here check the corrections. Usually this takes somewhat less time.

\*\*\* Very often, no further corrections are required after the second round, but if there still are corrections required, the process returns to step 5.
