

Evgenia Lysova, Vrije Universiteit Amsterdam

2.12.2022 14:00-15:30

Abstract

During the seminar, Evgenia Lysova will share forward-looking insights on the understanding and advancing meaningful work as a concept and a research field. She will draw on her recent work on the topic and especially those projects that call for and show the value in the integration of the concept of meaningful work with relevant yet separated concepts and research fields. In particular, Evgenia Lysova will discuss her forthcoming publications on the integration of meaningful work and decent work research fields. Here, she will connect decent work and meaningful work by drawing on the psychology of working theory and then discussing how societal context, organizational conditions, and individual practices promote access to each type of work. Also, she will share learnings and reflections on the integration of meaningful work with ethics and the future of work research fields within the framework of the Special Issue she currently wrapping up on the topic. Drawing on these insights, Evgenia Lysova will suggest future research directions broadening the available scholarship and methods concerning meaningful work.
