

Aalto University Custom Programs

Customise a program for your students at Aalto University

Design a tailor-made experience for your students

At Aalto University we are shaping a sustainable future. We build educational experiences that are both academically rigorous and unforgettable for your students. We want to welcome your students to experience multidisciplinary and challenge-based education at Aalto University.

Our custom programs prepare future leaders to tackle grand challenges through solutions for sustainability, radical creativity and an entrepreneurial mindset. All of our students get to combine academic interests with real world experiences.

Your students will be taught by top faculty and industry specialists, and mentored by experienced staff at Aalto University. Your

students will be surrounded by a vibrant, diverse and international community dedicated to building transformative learning experiences. We provide both on-campus and online programs for added flexibility.

We look forward to welcoming your students to Aalto University!

Multidisciplinary Custom Programs

Aalto University is founded on high-quality research, education, impact, and shared values of responsibility, courage, and collaboration.

At Aalto University, we are committed to identifying and solving grand societal challenges and building an innovative and sustainable future. We offer teaching and learning that is future-led and strongly emphasises collaboration with industries and society. Our highly international university is home to 12,000 students and a staff of 4,500.

Experience Aalto whenever it suits your students

We offer universities the opportunity to collaborate with us through customised academic study programs during all semesters at Aalto University campus in Espoo, Finland.

Each study program is designed in collaboration with you to ensure that the program is fully fit for your students' needs. We work with you to design on-campus or online programs with relevant content, faculty and learning methods.

Tailor-made experiences

For Bachelor or Master level students

1-4 week programs all year around

Support with accommodation

Online, hybrid and on-campus solutions available

Official Aalto University certificate after course completion

Tailor-made excursions to Lapland or Tallinn

Optional challenge-based business projects connecting students with local industries and society

Study content designed in collaboration with you in the areas of art, design, business, entrepreneurship, innovation, technology or engineering

Student Testimonial

'I would highly recommend this program to other students, in particular for those who want to refresh themselves through new experiences and want to participate in lectures by professors that are not available at their home university. This is also the perfect program for anyone who wants to visit Northern Europe and experience the Nordic culture.'

Jinsu Son, a **visiting student** at Aalto University in January 2022.

Jinsu is a bachelor's student in Mechanical Engineering and Electrical and Electronic Engineering at Ulsan National Institute of Science and Technology (UNIST), South Korea.

‘Staff at Aalto University delivered top-notch communication and support to the International Program collaboration with UNIST. It was fantastic to work with them – right from the first meeting, we felt certain that Aalto University has ample experience in proposing, coordinating, and managing short-term international programs. We knew we were in good hands.’

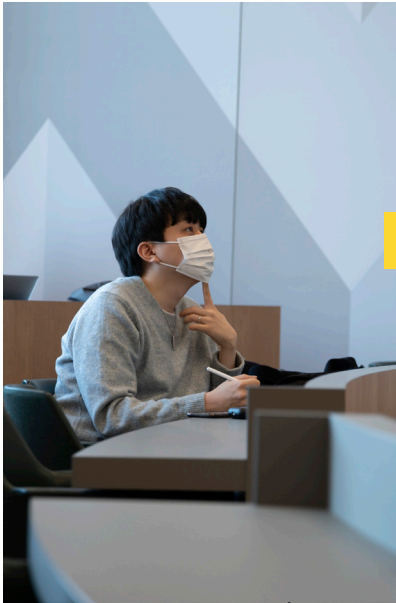

DaYon Shim, Short-term Program Coordinator
Centre for International Affairs, UNIST

					Farewell Dinner

Common course topics

Aalto University International Programs offer future-led and challenge-based learning experiences in some of today's most crucial topics led and taught by Aalto University faculty and industry specialists. We can design a customised program for your students within course topics like:

- Entrepreneurship
- Technology Innovation
- Service Design and Customer Experience
- Future-orientation
- Climate Change
- Wellbeing Architecture
- Sustainable Biomaterial Science
- Digital Business Strategies
- Leadership in the Digital Age
- Internet of Things (IoT)
- Artificial Intelligence and Machine Learning

Combine an academic experience with the best Finland
and Helsinki has to offer.

Challenge-based learning at Aalto University

During the program, students are able to combine the knowledge gained during lectures with a practical group project to deepen their learning experience.

Challenge-based learning offers students real-life challenges and learning practices aligned with work-life environments to increase the students' employability and shorten the gap between studies and career.

Relevant projects provide authentic learning experiences and allow students to explore, discuss, and meaningfully construct concepts and relationships.

Social Program

Our social program offers the perfect opportunities for networking and exploring Helsinki and Finland. We are also happy to combine your experience with shorter trips to for example Lapland or Tallinn to make the most out of your stay! A virtual social program is also available.

Kick-off event and Farewell party

We have previously hosted our welcome evenings in Allas Sea Pool, a beautiful seaside terrace in downtown Helsinki, as well as in the Rooftop Bar of Clarion Hotel Helsinki.

Suomenlinna Sea Fortress and Helsinki tour

Experience historic Helsinki! Suomenlinna island was built as a sea fortress, but is nowadays a unique residential area. Suomenlinna has been a UNESCO World Heritage Site since 1991.

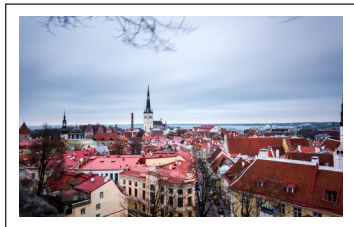

Nuuksio National Park

Nuuksio National Park is situated only a 30 minute bus ride from campus and throws you right into the beautiful, untouched Finnish nature with several hiking trails through lakes, mountains and pine forest.

Day trip to Porvoo

Porvoo is a town with history dating back to the 14th century. With an hour-long bus ride from Helsinki, Porvoo offers petite boutiques, fresh local ice cream and lots of tiny alleys to explore.

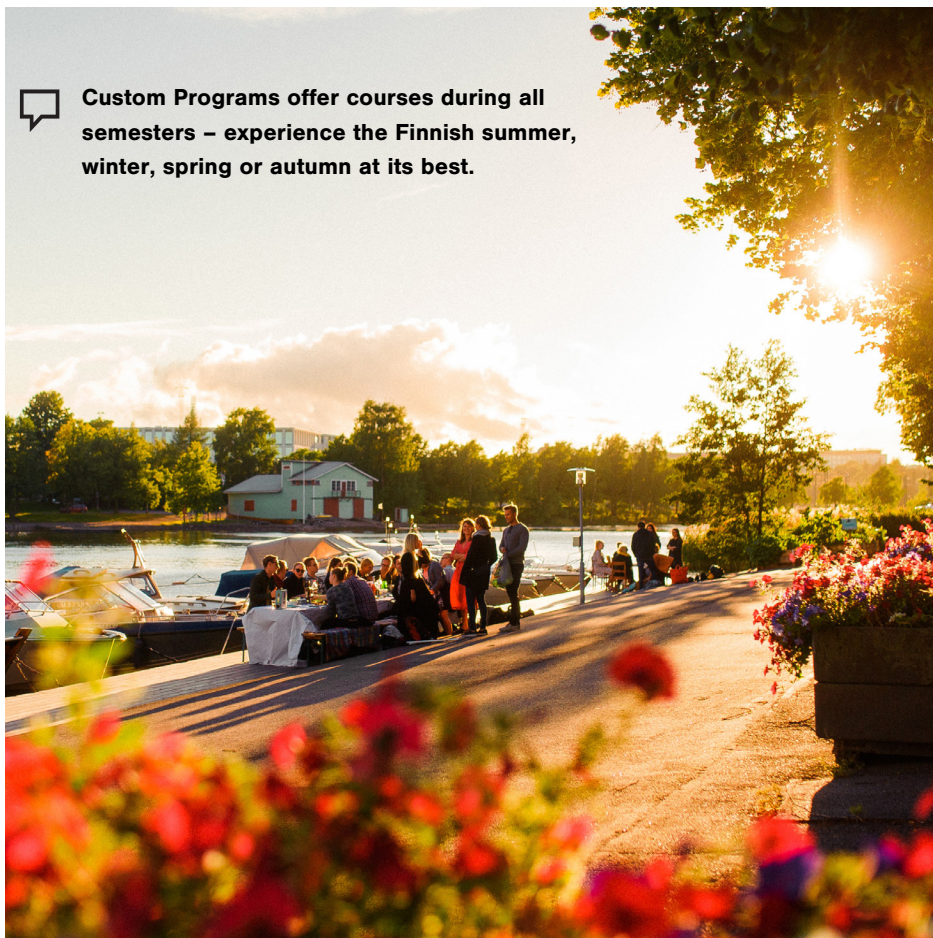

Trip to Tallinn

The Estonian capital of Tallinn is only a couple of hours of comfortable ferry travel away from Helsinki and offers everything from a medieval Old Town to fine dining at its best. Our local guide will make sure you don't miss out on anything!

Custom Programs offer courses during all semesters – experience the Finnish summer, winter, spring or autumn at its best.
