

Meet your Team!

This is your future Team, Data Analytics Platforms. We focus on data warehouse, analytics platforms and AI. We build solutions for our customers around Aalto, together with our sub-contractors. At the same time we develop the technical capabilities, journey towards the cloud, scalability and machine learning/AI experiments. Our Team combination of DW and Analytics people enables a lot of knowledge sharing, support for each other as well as cool problem-solving.

Although we work in a hybrid mode, our communication is very efficient, we have team days on campus, activities days, clubs e.g. cycling and other ones on Yammer. We collaborate in good spirit towards ambitious goals. We offer unparalleled combination of opportunities for personal growth, focus on wellbeing and true societal impact.

I'm Ville, and I am looking forward to working with you. I worked at Aalto for over ten years, after which I went to work in another organisation for several years, and this year, I came back. I enjoy the forward-looking actionable spirit, where Aalto is, in my opinion, a unique educational organisation. As an analytics developer, I would collaborate with you to design analytics solutions and build analytics capabilities and data access offerings for, e.g., reporting authors. I'm always ready for reflection, coffee, or going out for a walk for ideation.

Ville Kivimäki

Analytics Technology Owner / Data Analytics Platforms team
